

We are preparing for you a new, modern version of our web site. Please visit us again in a few days!

POLYMEDIA Technologies

POLYMEDIA Technologies Company works in a field of localization and distribution of software products for recording, editing and distribution of media content. POLYMEDIA is the exclusive distributor of the following SW products for the Czech Republic:

EduArt™ - Record, publish, archive

is a user-friendly software that on any PC using the Microsoft Windows operating system can record and synchronise video and audio (from camera and microphone) with a presentation shown on the screen of your PC (using any programme, for example PowerPoint, or a visualizer, an electronic board, a tablet, etc.) and at the same time creates the metadata content of your presentation.

MediaInTouch™ - Automatic distribution of information and feedback

Software solution of actual needs of all types of subjects (corporations, educational institutions, government, administration, etc.) for automatic, proactive distribution of information about events in their province (events, lectures, trainings, promotions, offers, etc.). Application server provides automatization, standardization and eases workload for all groups concerned in the transfer of information between publisher (institution) and taker / applicant (other institution, student, customer, media agency, etc.)
